Human error - Wikipedia

Human error is probably a Causal Factor. (See the definition of a Causal Factor here). When you see human error as a root cause, the result is often to find blame and ineffective corrective action. But the amount of discussion that I see and the people who even try suggesting corrective actions for human error with no further analysis is amazing.

Is Human Error a Root Cause? Find out here...

This usually happens in case of loss of control due to human error or technical malfunction including engine failure," Vardhan said. According to the expert, debris shows that the "aircraft was carrying a large amount of fuel due to a long flight and fuel tank exploded before or after impact."
