The price-earnings ratio (P/E ratio) is the ratio of a company's share price to the company's earnings per share. The P/E ratio is a measure to know how expensive the stock is when compared to scrips within the same industry or with the industry. Index P/E can be used as an effective comparison benchmark. Since NSE started, every time when Nifty's Price/Earnings ratio exceeded 22, the average return from indian equities over the subsequent three years became negative. Source - sanjaybakshi.net History clearly tells us that if you are a passive long term investor you should buy stocks when P/E reaches 15-16 and stop buying when P/E goes above 22. If you are not comfortable buying individual stocks then you should buy Nifty Bees ETF.

**NSE Nifty PE Chart (P/E Ratio) for last 10 years**  
A higher PE ratio means that investors are paying more for each unit of net income, making it more expensive to purchase than a stock with a lower P/E ratio. Value investors often search for stocks with relatively low P/E ratios as a means for identifying cheaper stocks that the market has largely passed over.
