Covid-19 symptoms: What we know now and what to do - CNN

Patients with confirmed SARS-CoV-2 infection have reportedly had mild to severe respiratory illness with symptoms of fever, cough, and shortness of breath. COVID-19 has a wide range of symptoms. The Self-Checker is a guide to help make decisions on when to seek testing and appropriate medical care.

Symptoms of Coronavirus | CDC

Does a coronavirus diagnosis mean I'll get pneumonia? Some patients with COVID-19 may develop pneumonia, a lung infection, if the virus makes its way to the lungs. If you have pneumonia, the air sacs in the lungs fill up with fluid, which impairs the lungs' ability to transfer oxygen and results in difficulty breathing.
