Is Psychiatry a Science? - World of Psychology

Psychiatry is the medical specialty devoted to the diagnosis, prevention, and treatment of mental disorders. These include various maladaptations related to mood, behaviour, cognition, and perceptions.See glossary of psychiatry.. Initial psychiatric assessment of a person typically begins with a case history and mental status examination.Physical examinations and psychological tests may be ...

Psychiatry - Wikipedia

Despite this confusion in terminology, psychiatry routinely contends that its diagnoses are based on science. In the Introduction to DSM-IV, the APA wrote: "More than any other nomenclature of mental disorders, DSM-IV is grounded in empirical evidence." (p xvii) And, of course, an enormous number of studies had been done.

Journal of Psychiatry and Behavioral Sciences

Modern psychiatry is not a science of mental disorder, it is an ideology of mental disorder. When I see medical students or registrars in training (residents), I ask them the following question. "On your first day in psychiatry, your first lecture, when the professor came in and began his lecture, what was the name of the model of mental disorder he said he would be addressing?"
