Building a web of inclusion means that ideas come from all employees, not just from the top down; that what individuals do in the workplace depends on their talents, not on their titles; that a...

The Web of Inclusion: A New Architecture for Building ...

A web is natural, organic, not modeled on a machine. Like a spider's web, a web of inclusion is both a structure and an ever-evolving process, constantly changing to meet the demands of the business environment. Building a web of inclusion means that ideas come from all employees, not just from the top down; that what individuals do in the workplace depends on their talents, not on their titles; that a premium is placed on flexibility; that the edges of the web of inclusion connect with ...

Inclusion by design

The frequent complaint that the architecture field lacks gender and racial diversity is backed up by statistics. As of 2011, just 15 percent of licensed architects were women, and just one percent were black, according to statistics assembled by the AIA. While a number of women architects have recently ascended to more-prominent positions and ...
